Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 7-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Scott et al.

Re claim 7, Scott et al discloses (column 11, line 66 - column 12, line 35; column 22, line 42 - column 23, line 39) a printing arrangement for reading an image, compressing the image data, reading out and decompressing the image data, and enlarging or reducing the image data. Control registers (column 22, lines 48-52) provide a plurality of print settings for enlargement/reduction and compression/decompression.

Re claim 8, the printing of multiple pages of image data would lay out the total image data "across pages".

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2624

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Scott et al in view of Saito (JP 04220366 A).

Re claim 9, Scott et al does not disclose the canceling of the printing of a blank page. Saito discloses (Abstract) a printing arrangement in which the printing of a page determined to be blank is cancelled. Saito, like Scott et al, is directed to the art of printing image. The use of the Saito arrangement to avoid the printing of blank pages, thereby preventing unnecessary feeding and use of paper; in the Scott et al printer would be an expedient obvious to one of ordinary skill in the art.

Allowable Subject Matter

5. Claims 1-6 & 10-11 are allowed.

6. The following is a statement of reasons for the indication of allowable subject matter:

Re claims 1 & 10 (and dependent claims 2-6 & 11), the art of record does not teach or suggest the recited control of compression and decompression timings in response to the content of an image processing.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Roberts et al, Kinjo et al, and Kessels et al disclose further examples of printers using image compression/decompression and scaling.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen M. Brinich at 703-305-4390. The examiner can normally be reached on weekdays 7:00-4:30, alternate Fridays off.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Tech Center 2600 Customer Service center at 703-306-0377.
